

Top drawer for storing petty cash

Bundle of notes being placed in depository drawer

2 Drawers with snap shut mechanism

Currency Bundle automatically drops down in to the safe storage cabinet

D-tel Plus

Depository Cabinet
WITH SNAP SHUT MECHANISM

Bank cashiers have to handle a lot of cash in the form of over the counter transactions with customers. Periodically as the amount of cash collected increases, the cashier requires to store the bundled notes at his counter, until they are moved over to the vault room.

In spite of the security measures adopted, there is always a threat of theft/pilferage of this high volume of cash from cash counters. To further magnify the security challenge, the counters used for storage also are of suspect quality, with most being ordinary wooden drawer cabinets without any security measures.

Godrej with its more than 100 years' experience in designing Banking Security Products, introduces **D-Tel Plus: Depository Cabinet with snap shut mechanism**. With this, the drawers can be shut with a simple push, a feature which is enabled by a high precision lock. The drawers can then be opened only with the help of a key. Snap shut mechanism can be activated as required.

Its unique design makes handling and storing cash effortless and also provides immense security. It is a depository cabinet with two drawers and safe storage unit underneath. The first drawer is used for keeping the loose petty cash for over the counter transactions, while the second drawer is a depository drawer, which has a drop down depository mechanism. The bundle of cash, is placed in this drawer and when the drawer is closed shut, the currency bundle automatically drops down in to the safe storage cabinet below. This unique and convenient feature, ensures that the cashier can conveniently deposit large bundles of cash, without opening the safe storage unit. The second depository drawer has a unique in built anti fishing mechanism which makes the prying open of the second drawer to access the safe storage unit below virtual impossible.

The size of D-Tel Plus is such, that it can easily be fitted below a cash counter. It can also be bolted to the ground or to the side panel, thus making it more secure.

Features:

- Made from prime quality CRCA steel
- Multibend construction, welded structure with out a single rivet confers enormous strength to D-Tel Plus, making it not only structurally rigid, but also aesthetically appealing
- Fitted with high precision Godrej 6 lever lock for the storage unit.
- 2 Drawers with snap shut mechanism, each fitted with a Godrej 6 lever lock
- Two-tone powder coated finish, far superior to any liquid paint.
- Undergoes a 7-step anti-corrosion treatment that inhibits corrosion.
- Provision for anchoring/bolting it to the ground or side panel.
