Distance will never be a problem when Solus Quadra Mobile Application is at hand, for Remote Viewing the video feed over internet using Smart Phone.

Monitoring of video feed over internet using Laptop
Carry security wherever you go with Web Server facility for Remote Viewing the video feed over internet using laptop.

Can connect to HDMI / VGA compatible monitors
Here's an example of security that's flexible without being less secure. The CCTVs can be connected to HDMI as well as VGA compatible monitors.

24 hour recording and instant alert feature
Make sure that no movement goes unnoticed, any hour of the day, any week, any month, any year! Thanks to the 24 hour recording and instant alert feature (when you are logged into the app) that warns in case of any motion detection, video masking or video loss.

Capture rate of 25fps
Capture rate of 25 frames per second for higher event capturing accuracy

Connect up to 4 CCTV cameras
All round monitoring is now a sure possibility with connections of up to 4 CCTV cameras easily possible to record 720p HD quality video.

Day and night monitoring and recording
Now No time will be safe for robbers as the Day and night monitoring and recording function will shut them out forever.

User friendly interface
User friendly interface ensures not just optimum safety but also makes it a pleasure to use. After all, security should be friendly right?

Can connect up to 4 microphones
Can connect up to 4 microphones so that you don't have to move from the comforts of your place at home in order to communicate with the visitor at the door.

Indoor dome and Outdoor bullet CCTV camera
Indoor dome camera further heightens the aesthetic appeal of the room. While the outdoor bullet CCTV camera means all business and no nonsense.

Mouse for on screen navigation
Mouse for on screen navigation makes usage simpler than ever and adds a touch of friendliness to the functioning.

1 TB storage
Mammoth 1 TB storage stage which means that every action outside your door will be recorded and stored for up to 30* days on the go.

*Only on motion detection for 60% of daylight time
